ISO/IEC 17025:2017 (by A2LA), and when required contractually, 10CFR2.	1.
The results contained herein relate only to the item calibrated. This certificat	te shall not be reproduced except in full, without the
written permission of J.H. Metrology Co., Inc.	
Metrology Technician	Neil Willert, President

J.H. Metrology Co., Inc.'s Calibration Control System complies with applicable requirements of ANSI Z540-1, ISO 9001:2015 (by DQS, Inc),

This certificate may contain data that is not covered by our 17025 Scope of Accreditation and are marked with an asterisk (\*). Pass/Fail tests are not accredited. Calibration Standards listed on this Certificate of Calibration with a Due Date of 00 0000 are support items that do not require calibration (NPCR).

- Reported uncertainties represent expanded uncertainties expressed at approximately the 95% confidence level using a coverage
- calibration interval.
- time of calibration only and any number of factors may cause the calibrated item to drift out of tolerance before the assigned

- The calibration results published in this certificate were obtained using test equipment that has been calibrated by Certified Standards
- · No sampling plan or other procedure was used for this calibration. Measurements and information on this certificate are valid at

- and are traceable through the National Institute of Standards and Technology (NIST), derived from natural physical constants, from

- ratio measurements, or compared to consensus standards to the International System of Units (SI). factor of k=2. J.H. Metrology Co., Inc. does not apply the reported calculated measurement uncertainty to manufacturer or other

- (!) Designates that the expanded uncertainty of measurement does not meet the 95% confidence level.

Technician Remarks: Calibrated per AMS 2750 F at Customer specified calibration points.

sources of tolerances/specifications to determine the instrument pass or fail status. (Uncertainties are listed separately for each test point.) It is the responsibility of the Customer to consider measurement uncertainty when determining the instrument suitability.
